|---------------|--|

PROJECTS

- **Route\_X**  
Developed a college chatbot utilizing Flask and Deep Learning technologies, providing students and staff with an efficient way to easily navigate and find departments and courses.

- **Cloud\_News**

Developed a news application using HTML, CSS, and JavaScript for the frontend, while create an API for the backend, enabling users to easily browse and access the latest news articles and updates.

- **Academio**

Developed "Academio," a web application for securely storing and displaying student results, featuring real-time updates and customizable report generation.
